

PH-13 PNEUMATIC FLOATER

PH-13 pneumatic floater machine is designed to roughen a surface of concrete after drying awhile. Standard floater includes all components from air connector to a flange of floater discs. The floater disc is ordered separately, diameter either 420 mm or 600 mm. Pneumatic line need to be equipped with air handling unit with filter with water separator, regulator and lubricator.

The tubular body is made of aluminium into which pneumatic gear motor is attached.

			PH-13
Diameter of plastic disc	mm	420 or 600 mm	
Speed in max. power	1/min	n. 160	
Torque max.	Nm	22	
Air consumption	l/min	600	
Power	W	375	
Weight, kg	kg	8,0	
Sound level	dB(A)	73	
Vibration of gear motor	m/s ²	2,5	
Values calculated with	bar	6
